

JUDY BUI

Toronto, Canada · judybui712@gmail.com · [LinkedIn](#) · [GitHub](#)

Full Stack Software Engineer with 5+ years of experience building and scaling production web applications using TypeScript, Node.js, React, Next.js, GraphQL, and SQL. Experienced in designing backend services, database architecture, third-party integrations, and production systems serving thousands of users.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, PHP, C++
- **Frontend:** React.js, Next.js, Redux Toolkit, Material UI
- **Backend:** Node.js, Express, Laravel, REST APIs, GraphQL
- **Databases:** MySQL, PostgreSQL, Sequelize ORM
- **Cloud & DevOps:** AWS, GCP, Docker, CI/CD, NGINX
- **Infrastructure & Tools:** Redis, Shopify APIs/POS
- **Testing:** Jest, JUnit, Mockito

WORKING EXPERIENCE

Shop This City - Full Stack Software Engineer

May 2023 - Aug 2026

Toronto, ON (remote)

- Built a Progressive Web Application (PWA) using React.js, Next.js, and TypeScript, serving 30K monthly visitors, 3K+ active users, 1000+ brands & stores across 3 provinces in Canada, and 10K+ products streamlined.
- Introduced Redux Toolkit to standardize application state management across frontend projects, improving maintainability and reducing duplicated state logic.
- Designed and developed a Node.js/GraphQL wholesale B2B microservice integrating with Shopify POS orders and products, supporting order, inventory, and wholesaler-brand management; launched with 10 wholesalers and 2,000+ products.
- Designed database schemas and implemented migrations, Sequelize models, SQL queries, and REST APIs to support wholesale workflows and frontend integration.
- Implemented Redis caching and scheduled background jobs to support system performance and automation.
- Developed and enhanced 4 production backend microservices, including the primary Laravel/PHP backend, while diagnosing and resolving production issues.

Simbi.io - Intermediate Full Stack Software Engineer

Vancouver, BC

Apr 2022 - Feb 2023

- Rebuilt core application functionality using Next.js, Redux, GraphQL, and Material UI to improve scalability and support rapid user growth.
- Redesigned the PostgreSQL schema by introducing new tables and relationships to support product requirements while preserving data integrity and improving query performance.
- Developed RESTful APIs and event-driven hooks to support new features and complex database workflows
- Troubleshoot application issues and validated changes through CI/CD pipelines before production releases.
- Created technical documentation using Docusaurus for new features, system upgrades, and developer workflows.

PledgX Inc. - Full Stack Software Developer

Toronto, ON

May 2021 - Mar 2022

- Developed Python and C++ automation scripts to process 180K+ construction bidding records, extract data from PDFs, and update MySQL databases.
- Built the company's core general contractor application from scratch to production using React.js and Python Flask, supporting public/private sector adoption and contributing to its first investment.
- Redesigned MySQL schemas and server-side logic to reduce data redundancy and improve maintainability.
- Deployed and maintained applications on GCP, configuring NGINX and deployment infrastructure.

International Financial Data Services (IFDS) - Software developer Co-op

Toronto, ON

Sep 2019 – Dec 2019

- Developed Java/Spring applications and automated unit tests using JUnit and Mockito..

NAPA Global – Full Stack Software Developer Co-op

Danang, Vietnam

May 2019 – Aug 2019

- Developed a responsive web application using Angular, Node.js, MongoDB, Bootstrap, and REST APIs.

EDUCATION

Toronto Metropolitan University – B.Sc., Computer Science

Sep 2017 – May 2021

Toronto, ON

- Honours Bachelor of Science in Computer Science, Minor in Finance
